

THELAN

Transforming challenges into solutions
by driving innovation and order.
At Thelan, the world is our project.

TECHNICAL PROFESSIONAL SERVICES

Delivering Value through planning, management, analysis, and execution.

PROGRAM MANAGEMENT

Between kickoff and completion, many projects spin out of control, exceeding budgeted time and resources and reducing positive impact. With a dedicated team of Thelan experts, your projects will stay on time and on budget as you meet your desired outcomes. Thelan has a history of excellence supporting large-scale project implementations with industry-certified experts working together to ensure project success.

Thelan has documented past performance in developing, maintaining, and controlling project plans for both federal and private initiatives. A highly-skilled team of consultants can provide PMO support in a variety of ways, including: identifying and correcting project risk areas, quality assurance and control, program reporting, ad hoc support, portfolio management, portfolio prioritization and rationalization, and more. All PMO support plans are custom created for each client's unique needs and context.

PMO SUPPORT

PROJECT CONTROLS

Thelan's Project Controls team is led by PMP-certified professionals to implement varied tools and techniques to monitor and control project schedules. This includes: developing and controlling program plans, Earned Value Management, Critical Path analysis, ongoing updates and schedule maintenance, and strategic re-planning and schedule crashing where required.
